

PHU DOAN HOANG THIEN

MOBILE DEVELOPER INTERN

Hoa Khanh Bac, Lien Chieu, Danang, VietNam | dhtphu05@gmail.com | 0385544194 | [LinkedIn](#)

PROFILE

Dedicated Software Engineering student aspiring to become a professional **Fullstack Engineer**. Driven by a passion for creating high-impact digital products, I focus on engineering **optimized solutions** and high-fidelity interfaces that solve real-world challenges. With a proactive **growth mindset**, I am eager to master professional **development workflows** and deep **product thinking**. My goal is to bridge the gap between complex technical logic and intuitive user experiences through continuous learning and effective teamwork.

EDUCATION

University of Science and Technology – The University of Da Nang

Sept 2023 – Aug 2027

Bachelor of Information Technology

GPA: 3.71/4.00

- **Major:** Software Engineering
- **First Prize, BK SMART CAMPUS 2026:** Awarded for the most innovative Digital Transformation and Smart Management solution at Danang University of Science and Technology.
- **Bronze Medal, DUT Codeleague 2025:** Recognized for excellence in competitive programming and algorithmic problem-solving.
- **Leadership:** Active member of IT Faculty Student Union; strong in teamwork, communication, and proactive leadership.
- **University Job Portal:** Collaborating to enhance UI/UX and develop features for [jobs.dut.udn.vn](#).
- **Job Fair Digitalization:** Leading the “Digital Twin” module to modernize the university’s career events ([checkin.dut.udn.vn](#)).

PROFESSIONAL EXPERIENCE

Software Developer

Sept 2025 – Mar 2026

OpenVerse

Danang

Project 1: Comprehensive SaaS Booking Ecosystem (Web & 2 Mobile Apps)

- **Full-stack Development:** Led end-to-end development for a Spa SaaS, including a web management system and two React Native (Expo) apps for Customers and Businesses.
- **Core Web Modules:** Architected Authentication, a merchant Website Builder, Customer Management, and SEO-optimized Landing Pages.
- **Mobile & Operation Features:** Engineered real-time Google Maps integration, intuitive Booking flows, Reviews system, and a Multi-store switching capability for owners.
- **Performance Excellence:** Slashed Calendar loading time by 80% (5s to 1s) and minimized Map re-renders using Zustand and React Query.
- **Agile Collaboration:** Proactively collaborated with the Backend team to design API schemas, ensuring 100% UI/UX fidelity and early bug detection.

Project 2: Blockchain P2E Gaming Platform (Web3 & PWA)

- **Web3 Integration:** Developed high-fidelity UI for In-game Stores, P2P Marketplaces, and real-time Notification systems.
- **UI/UX & PWA:** Translated Figma designs into pixel-perfect, responsive interfaces while optimizing PWA features for enhanced mobile stability.

Student

Sept 2023 – Present

University of Science and Technology – The University of Da Nang

DUT Job Fair Management System | Full-stack Lead & Product Visionary

Official University Digitalization Project | 02/2026 – Present

- **Spearheaded product vision and end-to-end development** for the official DUT Job Fair ecosystem ([checkin.dut.udn.vn](#)) using **Agile** to manage a cross-functional team.
- **Architected a modular NestJS & Next.js infrastructure** featuring real-time **QR check-ins**, **Digital Passports**, and multi-role access control (RBAC).
- **Collaborated with stakeholders** to design a high-converting landing page and live analytics dashboards, streamlining event operations for **DUT Job Fair 2026**.

- **Optimized development workflows** via OpenAPI code generation (Orval) and **Docker**, ensuring high reliability and seamless frontend-backend synchronization.
- Tech Stack:** NestJS, Next.js (App Router), PostgreSQL, Tailwind CSS, React Query, Zustand, Docker, OpenAPI.

Full-stack Digital Photobooth Platform | Solo Developer & Founder

Commercial Deployment: photobooth.lcdkhoacntt-dut.live | 12/2025 – Present

- **Solo-developed and deployed** a commercial platform for fundraising that **generated 15M+ VND in revenue within just 4 days** of operation at a large-scale event.
- **Engineered a real-time, event-driven architecture** using **Socket.IO** to flawlessly synchronize interactions across a multi-device ecosystem (Controller, Monitor, and Mobile Share Page).
- **Architected a robust media processing pipeline** utilizing **FFmpeg** for video transcoding (ensuring iOS compatibility) and Google Cloud Storage for instant results delivery via QR codes.
- **Streamlined the end-to-end user journey**, from automated burst capture and digital signatures to photo-strip generation, maintaining **high system reliability** under peak traffic.
- **Integrated automated API workflows** via OpenAPI and Orval, accelerating development and ensuring a seamless, production-ready Full-stack implementation.

Tech Stack: Next.js, NestJS (TypeScript), Socket.IO, PostgreSQL, Google Cloud Storage, FFmpeg, Docker, Radix UI.

OTHER PROJECTS

Explore additional team-based collaborations and technical experiments on my GitHub: <https://github.com/dhtphu05>

AREAS OF EXPERTISE

Languages: JavaScript (ES6+), TypeScript, Java
Frontend & Mobile: Next.js, React.js, React Native (Expo), Tailwind CSS, HTML5/CSS3
State Management & Data Fetching: React Query, Zustand, Socket.io
Backend & Databases: Node.js, NestJS, Express.js, PostgreSQL, MongoDB, MySQL, Swagger
Infrastructure & DevOps: Google Cloud Platform (GCP), Docker, GitHub Actions (CI/CD), Git/GitHub
Design & Tools: Figma (UI/UX collaboration), Agile/Scrum, Jira
AI Tooling: Antigravity, Codex, and Gemini
Soft Skills: Product & UI/UX Thinking, Leadership & Teamwork, Strong Ownership, Proactive Growth Mindset, Creative Problem-solving, Effective Communication, Resilient under pressure

LICENSES & CERTIFICATIONS

Introduction to Agile Development and Scrum, IBM	Sept 2024
AWS Cloud Technical Essentials, AWS	Sept 2024
Version Control, Meta	Aug 2024
